The ADA defines abnormalities in albumin excretion as follows:

Albuminuria Category                      Result (mg/g creatinine)

Normal to Mildly increased              <30  
Moderately increased                      30-299  
Severely increased                          > OR = 300

The ADA recommends that at least two of three specimens collected within a 3-6 month period be abnormal before considering a patient to be within a diagnostic category.
