ANA SCREEN, IFA, W/REFL TITER AND PATTERN			
ANA SCREEN, IFA	NEGATIVE	NEGATIVE	
<p>ANA IFA is a first line screen for detecting the presence of up to approximately 150 autoantibodies in various autoimmune diseases. A negative ANA IFA result suggests an ANA-associated autoimmune disease is not present at this time, but is not definitive. If there is high clinical suspicion for Sjogren's syndrome, testing for anti-SS-A/Ro antibody should be considered. Anti-Jo-1 antibody should be considered for clinically suspected inflammatory myopathies.</p> <p>AC-0: Negative</p> <p>International Consensus on ANA Patterns (https://doi.org/10.1515/ccim-2018-0052)</p> <p>For additional information, please refer to http://education.QuestDiagnostics.com/faq/FAQ177 (This link is being provided for informational/ educational purposes only.)</p>
