

Patient Information	Specimen Information	Client Information

**COMMENTS:**

Test Name	In Range	Out Of Range	Reference Range	Lab
LYME DISEASE AB W/REFL TO BLOT (IGG, IGM) LYME AB SCREEN	<0.90		INDEX	

REFERENCE RANGE: <0.90

Index	Interpretation
< 0.90	NEGATIVE
0.90-1.09	EQUIVOCAL
> 1.09	POSITIVE

As recommended by the Food and Drug Administration (FDA), all samples with positive or equivocal results in a Borrelia burgdorferi antibody screen will be tested using a blot method. Positive or equivocal screening test results should not be interpreted as truly positive until verified as such using a supplemental assay (e.g., B. burgdorferi blot).

The screening test and/or blot for B. burgdorferi antibodies may be falsely negative in early stages of Lyme disease, including the period when erythema migrans is apparent.
