|                     |                      |                    |

**COMMENTS:**

| Test Name | In Range    | Out Of Range | Reference Range | Lab |
|-----------|-------------|--------------|-----------------|-----|
| FTA-ABS   | Nonreactive |              | Nonreactive     |     |

The FTA-ABS is a treponemal assay that is intended to be used with other tests (e.g., RPR) as part of a diagnostic algorithm for syphilis. The preferred treponemal-specific tests for confirmation of a reactive RPR are Treponema pallidum Particle Agglutination (TP-PA) or other treponemal antibody assays. From Sexually Transmitted Infections Treatment Guidelines, 2021 MMWR Recomm Rep 2021;70 (No. RR-4): pg.39.
