Report Status: Final

Patient Information	Specimen Information	Client Information

COMMENTS:

Test Name	In Range	Out Of Range	Reference Range	Lab
TOXOCARA AB (IGG), SERUM	NEGATIVE			

REFERENCE RANGE: NEGATIVE

Results of this assay must be interpreted with caution, as broad variations in antibody response occur, and levels may remain elevated for years after infection. Further, antibodies induced by other parasitic infections, such as Strongyloides and Cysticercus, may cross-react in this assay. Although a negative result usually rules out infection with Toxocara spp., repeat testing may be clinically warranted in early infection.
