

Patient Information	Specimen Information	Client Information

COMMENTS:

Test Name	In Range	Out Of Range	Reference Range	Lab
VARICELLA ZOSTER VIRUS ANTIBODY (IGM)	0.15			
	Value	Interpretation		
	-----	-----		
	0.00-0.90	Negative		
	0.91-1.09	Equivocal		
	>=1.10	Positive		

Results from any one IgM assay should not be used as a sole determinant of a current or recent infection. Because an IgM test can yield false positive results and low levels of IgM antibody may persist for more than 12 months post infection, reliance on a single test result could be misleading. If an acute infection is suspected, consider obtaining a new specimen and submit for both IgG and IgM testing in two or more weeks.
