

Patient Information	Specimen Information	Client Information

COMMENTS:

Test Name	In Range	Out Of Range	Reference Range	Lab
MYELOPEROXIDASE ANTIBODY	<1.0		<1.0 AI	

Value	Interpretation
<1.0 AI	No Antibody Detected
>or=1.0 AI	Antibody Detected

Autoantibodies to myeloperoxidase (MPO) are commonly associated with the following small-vessel vasculitides: microscopic polyangiitis, polyarteritis nodosa, Churg-Strauss syndrome, necrotizing and crescentic glomerulonephritis and occasionally granulomatosis with polyangiitis (GPA, Wegener's). The perinuclear IFA pattern, (p-ANCA) is based largely on autoantibody to myeloperoxidase which serves as the primary antigen. These autoantibodies are present in active disease.
