Test Name	Result	Reference Range	Lab
<b>LUPUS PANEL 2 W/ANA, IFA W/REFL TITER/PATTERN</b>			
<b>ANA SCREEN, IFA, W/REFL TITER AND PATTERN</b>			
ANA SCREEN, IFA	NEGATIVE	NEGATIVE	
<p>ANA IFA is a first line screen for detecting the presence of up to approximately 150 autoantibodies in various autoimmune diseases. A negative ANA IFA result suggests an ANA-associated autoimmune disease is not present at this time, but is not definitive. If there is high clinical suspicion for Sjogren's syndrome, testing for anti-SS-A/Ro antibody should be considered. Anti-Jo-1 antibody should be considered for clinically suspected inflammatory myopathies.</p> <p>AC-0: Negative</p> <p>International Consensus on ANA Patterns (<a href="https://doi.org/10.1515/cclm-2018-0052">https://doi.org/10.1515/cclm-2018-0052</a>)</p> <p>For additional information, please refer to <a href="http://education.QuestDiagnostics.com/faq/FAQ177">http://education.QuestDiagnostics.com/faq/FAQ177</a> (This link is being provided for informational/ educational purposes only.)</p>
