

Patient Information	Specimen Information	Client Information

COMMENTS:

Test Name	In Range	Out Of Range	Reference Range	Lab
QN THYROGLOBULIN W/O TGAB THYROGLOBULIN	11.9		ng/mL Reference Range: Intact Thyroid 2.8-40.9 Athyrotic <0.1	

Note: Abnormal flagging is based on the reference interval for patients with intact thyroid.

This test was performed using the Beckman Coulter chemiluminescent method. Values obtained from different assay methods cannot be used interchangeably. Thyroglobulin levels, regardless of value, should not be interpreted as absolute evidence of the presence or absence of disease.

Thyroglobulin antibodies (TGAB) interfere with thyroglobulin (TG) assays; therefore, TGAB assay should always be performed in conjunction with a TG assay.
