

— Infections

Infectious diseases are disorders caused by organisms; such as bacteria, viruses, fungi or parasites. Many organisms live in and on our bodies. They're normally harmless or even helpful, but some organisms ... [See more](#)

Viral Infections

Viruses are capsules with genetic material inside. They are very tiny, much smaller than bacteria. Viruses cause familiar infectious diseases such as the common cold, flu and warts but they can also cause ... [See more](#)

RABIES VACCINE RESPONSE END POINT TITER

(IU/mL)

Result Comments

Reportable range is 0.1 to 15.0 IU/mL
LESS THAN 0.1 IU/mL: Below detection limit

RABIES NEUTRALIZING ANTIBODY TITRATION
(RFFIT) RESULTS VERIFIED BY:

In humans, a result of 0.5 IU/mL or higher is considered an acceptable response to rabies vaccination according to the World Health Organization (WHO) guidelines; see WHO and Advisory Committee on Immunization Practices documents for additional guidance. Also, there is more information at www.vet.ksu.edu/rabies. (Note: the symbol ">" means "greater than" and ">=" means "greater than or equal to").
