

— Infections

Infectious diseases are disorders caused by organisms; such as bacteria, viruses, fungi or parasites. Many organisms live in and on our bodies. They're normally harmless or even helpful, but some organisms ... [See more](#)

Viral Infections

Viruses are capsules with genetic material inside. They are very tiny, much smaller than bacteria. Viruses cause familiar infectious diseases such as the common cold, flu and warts but they can also cause ... [See more](#)

PARVOVIRUS B19 ... **0.2**

Range: See Comments

PARVOVIRUS B19 ANTIBODY (IGG)

Result Comments

REFERENCE RANGE: <0.9

INTERPRETIVE CRITERIA:

- <0.9 Negative
- 0.9 - 1.1 Equivocal
- >1.1 Positive

IgG persists for years and provides life-long immunity. To diagnose current infection, consider Parvovirus B19 DNA, PCR.

PARVOVIRUS B19 ... **0.1**

Range: See Comments

PARVOVIRUS B19 ANTIBODY (IGM)

Result Comments

REFERENCE RANGE: <0.9

INTERPRETIVE CRITERIA:

- <0.9 Negative
- 0.9 - 1.1 Equivocal
- >1.1 Positive

Results from any one IgM assay should not be used as a sole determinant of a current or recent infection. Because IgM tests can yield false positive results and low levels of IgM antibody may persist for months post infection, reliance on a single test result could be misleading. If an acute infection is suspected, consider obtaining a new specimen and submit for both IgG and IgM testing in two or more weeks. To diagnose current infection, consider Parvovirus B19 DNA, PCR.
